ICT Strategy
Any learning opportunity, any education system, any learner, any time, anywhere.

Information Management

Programs of work

Data management program

Data will be managed through constructing the relevant data architecture, ensuring correct governance and security, maintaining quality data and managing the data’s lifecycle.
ICT Strategy
Any learning opportunity, any education system, any learner, any time, anywhere.

Information Management

Programs of work

Master data program
Students will benefit from a consistent and state-wide information system.

This means that, where possible, data is entered only once and captured as close as possible to the source.
Information Management

Programs of work

Enterprise content management

The one-view of customers allows for the distillation of information into corporate metadata that can be published and referenced, and is compliant with national and state reporting requirements.
Information Management

Programs of work

Enterprise content management

Flow-on improvements include an accurate web-based directory service and data that is traceable.
ICT Strategy
Any learning opportunity, any education system, any learner, any time, anywhere.

Information Management

Programs of work

Reporting and analytics

Administration staff and school and TAFE decision-makers will possess quality data.

The standardised system provides for consistent quantitative reporting and allows for the improvement of corporate and financial decision making.
ICT Strategy
Any learning opportunity, any education system, any learner, any time, anywhere.

Information Management

Success indicators
ICT Strategy

Any learning opportunity, any education system, any learner, any time, anywhere.

Information Management

Success indicators

The number of applications conforming to the enterprise data model increases and the number of application interfaces reduces.
Information Management

Success indicators

Accuracy and compliance in reporting increases and data omissions and duplications decreases.
